

Essential Business Verification

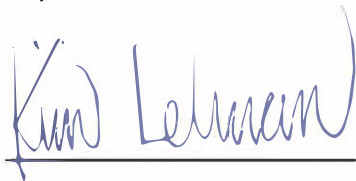

Wednesday, 3/25/2020

Due to the Coronavirus pandemic, several states including Wisconsin and Illinois are issuing a “Stay at Home” order for all non-essential businesses to contain the spread of the COVID19 virus. Based on the Department of Homeland Security guidelines, some businesses are deemed essential and should continue to operate.

Communications Engineering Company (CEC) is deemed an essential business by CISA guidelines under the Communications sector, in addition to supporting several other sectors included in the CISA Essential Critical Infrastructure Workers definition such as Healthcare & Public Health, and Critical Manufacturing. CEC has a special responsibility to maintain normal work schedule as directed by the Department of Homeland Security. CEC will continue to integrate and support critical systems including life-safety systems, Healthcare communications, Security, Information Technology, RF and Audio/Video solutions.

_____ is an employee at Communications Engineering Company (CEC), and will require travel between their home and the workplace and/or jobsites at businesses CEC is supporting.

Kim Lehrman, President/CEO – CEC

The Experience Matters
